

Gas Handling Equipment Design and Delivery Systems

Praxair's gas handling solutions are designed and produced at our Specialty Gases Equipment Center of Excellence. The equipment center offers our new *ProStar™* Platinum gas delivery equipment, standard and customized gas processing equipment and technical support for the wide range of industries using our specialty gases. You can rely on Praxair to help you preserve the purity of your mixture and ensure the correct gas flow and delivery pressure for your applications. As an industry leader, we are known for:

- Excellent supply capabilities throughout North America with strategic stocking locations and state-of-the-art warehousing and distribution logistics.
- An inventory available through local stocking locations from key production sites throughout North America.
- Drop ship services direct from key manufacturers when required.
- Express couriers and common carriers for quick, efficient, local service.
